

Drive By

hit the gas going fast kicking some ass having fun tonight
I jumped a ride driving bye now we can fly with nothing in sight
in the back in the front calling shot gun time to take a seat
grab a beer drink it down take another you can feel the heat

and when those cops pulled you over, you got nothing to hide
You just wish those bastardz, would just go and drive right

its a drive by
you can take a ride
its a drive by

buckle up in the truck not getting stuck cause im feeling alright
off the road in the dirt never getting hurt cause those lights were bright
got a plan need a hand we're lost again got no wheres to go
took my plate out of state you can relate and ill you need to know

is when those cops pulled you over, you got nothing to hide
you just wish those bastardz
would just go and drive right bye

its a drive bye
you can take a ride
its a drive bye

hit the gas going fast kicking some ass having fun tonight
I jumped a ride driving bye now we can fly with nothing in sight
in the back in the front calling shot gun time to take a seat
grab a beer drink it down take another you can feel the heat

and when those cops pulled you over, you got nothing to hide
You just wish those bastardz, would just go and drive right

its a drive bye
you can take a ride
its a drive bye

its a drive bye
you can take a ride
its a drive bye

IN THE COUNTY

i know that you want my freedom and i know that you want control
and i know that you want some comfort and know that you want control
and i feel something inside me something that don't belong
and know that you feel nothing thats why you drag it on

you haven't caught us yet
you haven't caught us yet
you haven't caught us yet

CHORUS

And we're nothing but drunken bastardz
We can smoke weed anytime
And you're nothing but a fucking disaster
You can go and do your crime
Cuz you can drink, and you can drive
Or you can smoke, and you can fly

You haven't caught us yet

And I take what is for granted
You take what you can steal
And I know that you were lying
I want to know what's real
And I heard what you were saying
And I liked what you were showing
And I can't ever forget you
That's how I learn, from growing

You haven't caught us yet
You haven't caught us yet
You haven't caught us yet

CHORUS

And we're nothing but drunken bastardz
We can smoke weed anytime
And you're nothing but a fucking disaster
You can go and do your crime
Cuz you can drink, and you can drive
Or you can smoke, and you can fly

And I heard what you were saying
And I liked what you were showing
And I can't ever forget you
That's how I learn, from growing

You haven't caught us yet

You haven't caught us yet
You haven't caught us yet
You haven't caught us yet
You haven't caught us yet
You haven't caught us yet

You haven't caught us yet
You haven't caught us yet
You haven't caught us yet

BUZZKILL

my ride was late she said maybe you could stay
this happened yesterday it happens everyday
and i only wanted just one day with no fighting
it could of happened it should of happen

just one day with no fighting
it could of happened should of happened
just one day with no fighting
it could of happened should of happened

and my girl was mad she said maybe you should leave
this happened once before she kicked me out the door
and i don't even know why we are fighting anymore
this could of happened it should of happened

just one day with no fighting
it could of happened should of happened
just one day with no fighting
it could of happened should of happened

just one day with no fighting
it could of happened should of happened
just one day with no fighting
it could of happened should of happened

Metal For Mark

This time that you will see
You haven't got the best of me
You're trying to drag me down

Drivin' down the county road
Feeling pissed and need to unload
You're trying to drag me down

CHORUS

Run and hide
You picked your side
Now run and hide
You picked your side
Now run and hide
Pick your side
Run and hide

No more crying and no more tears
All I care about is ice cold beers
You're trying to drag me down

And all I do is shake my head
At the choices you have made
You're trying to drag me down

CHORUS

Cooler stocked and smoke in one hand
And this bastard's taking a stand
You're trying to drag me down
All I care about is ice cold beers
You're trying to drag me down

CHORUS

And this time you will see
You haven't got the best of me
You're trying to drag me down
And you're time will never come
You should just go and run
You're trying to drag me down

The Bastard

They say I'm slowing you down
Better not to be around
They'll try to say I'm to blame
Whenever its gonna rain

CHORUS

Cause I'm going to bring you down
Every time I turn around
And this bastard aint got no place
And I don't like you anyway
Watch those vultures circling
Looking for their opening
Always stronger in a crowd
Cause one by one they all fall down

They'll twist your truth into lies
And tear it down in your eyes
They'll try to say I was made
Only to bring you pain

CHORUS

Cause I'm going to bring you down
Every time I turn around
And this bastard aint got no place
And I don't like you anyway
Watch those vultures circling
Looking for their opening
Always stronger in a crowd
Cause one by one they all fall down
Cause one by one they all fall down

They'll try to say I'm to blame
Whenever its gonna rain

Cause I'm going to bring you down
Every time I turn around
And this bastard aint got no place
And I don't like you anyway
Watch those vultures circling
Looking for their opening
Always stronger in a crowd
Cause one by one they all fall down
Cause one by one they all fall down

RISE UP

Living the life that I got to live
Giving everything that I have to give
Taking any chance whenever I can
Now it's my turn to take a stand

Rise up
Rise up
Rise up

Chorus:
Come and take a stand
I am even willing
To give you just one hand
You understand.
Take my hand.
You can be like me

Living your life inside that chair
Taking no chance because you're scared.
Saying those lies inside that prayer.
Hoping you can just sit right there.

Rise up
Rise up
rise up

Chorus:
Come and take a stand
I am even willing
to give you just one hand
You understand
You can be like me
Just come stand and see

There is no reason to be afraid
That's what people always say
And if you are feeling like you have lost your plan,
Come and take a fucking stand

Telling everybody to stay right here,
Making all those people show some cheer
feeling like you are number one
Taking a stand with your shot gun

Rise up
Rise up
