

Sinful ways - Burst into flames

Verse

At first glance we were aghast, the rally of the free is here at last

Present to fight for the life we always dreamt of

Anxiously we must await, for the battle and our fate

Will we be remembered will we be forgotten?

Prechorus

I feel my soul is on fire, we will fear no evil

Injustice caused desire and we won't back down

I feel my soul is on fire, we will fear no evil

Injustice caused desire, will you let your heart

Chorus

Burst into flames! Become the one who will burst into flames

Burst into flames! Become the one who will burst into flames

Verse

The times now for the attack, charge forward and don't look back

Remember what caused the rage inside of our hearts

This is just our destiny, we must fight so desperately

Never will we forget the blood of the fallen

Prechorus

Chorus

Bridge

Forced yourself upon us. We didn't want to, but we will mourn Now the time has come. You played with fire now you will burn (Go!)
