Cold Barrel lyrics

I will do this on my own
The cold barrel, it shakes
Find the trigger, and I pull the tension
Not much longer, and I will be gone

Chorus-

I feel I'm not able
To keep going in this life
Still breathing, but not living
The pain is too much to bear

I will always remember you
Here I sit, strong and ready
I will be with you forever
One shot, one love, one life

Chorus
