

Nate Silva – The Chase [2024]  
Album Lyrics

**Best Damn Thing**  
**Music & Lyrics by Nathan Da Silva**

Verse 1:

It's nice to meet you  
Now that I see your face  
So kind of you to  
Put all of this time to waste  
Disconnected lines, no fault of mine  
Unfamiliar signs, get out of line

Chorus:

I don't know if I could choose  
What must be done, and make this go away  
I never knew I could lose  
The best damn thing, I thought was here to stay  
I'm not like the things you say  
It's just like you anyway  
I'm not like the mess you made  
It's just like you anyway

Verse 2:

It's nice to know that  
I can just take the blame  
It's kind of you to  
Twist that knife with no shame  
Disconnected lines, no fault of mine  
Unfamiliar signs, get out of line

Chorus:

I don't know if I could choose  
What must be done, and make this go away  
I never knew I could lose  
The best damn thing, I thought was here to stay (x2)

I'm not like the things you say  
It's just like you anyway  
I'm not like the mess you made  
It's just like you anyway (x2)

## **The Chase**

**Music by Nathan Da Silva & Brendan Soares**

**Lyrics by Nathan Da Silva**

Verse 1:

You take the path you make  
But end up back where you start  
No turning back this time  
'Cause you're next in line  
You're spinning 'round and 'round  
You gotta regain your ground  
So take control of your life  
'Cause it's up to you

Chorus:

And the beat goes on  
As the world crumbles down  
And people change  
But we work it out somehow  
And we take what we can make  
Through the constant rise and fall  
But it's one mistake  
You'll have to live with now

Verse 2:

You answer to no one  
You grab the prize and you run  
So leave behind your past  
Better make it fast  
Society's a mess  
Everyone's driven by fear  
You know you'll stick to your guns  
'Cause the choice is clear

Chorus:

And the beat goes on  
As the world crumbles down  
And people change  
But we work it out somehow  
And we take what we can make  
Through the constant rise and fall  
But it's one mistake  
You'll have to live with now

Bridge:

Dig deep and keep the pace  
(On and on and on and on)  
Don't lose sight of the chase

(On and on and on and on)  
No matter what you face  
(On and on and on and on)  
Don't lose sight of the chase  
(On and on and on and on)

Chorus:

And the beat goes on  
As the world crumbles down  
And people change  
But we work it out somehow  
And we take what we can make  
Through the constant rise and fall  
But it's one mistake  
You'll have to live with now

### **Come Down**

**Music by Nathan Da Silva**

**Lyrics by Nathan Da Silva & Brendan Soares**

Verse 1:

Fantasies and make-believe  
Living your hypocrisy, I stand  
Silent eyes, watching by  
Secrecies and trust you steal  
High on those familiar feels  
Lying through your teeth will make them rot

Verse 2:

Nothing's what it seem to be  
Questioning one's sanity, I fly  
Fly away with burning eyes  
Pulled the veil right over me  
Played the game you played on me  
Lying through those teeth will make them rot

Chorus:

I let my guard down, and you got away  
I'm crying out now, and you got nothin' to say  
Come down, down from this  
You're breaking down, down  
Everything we've made  
I let my guard, and you got away  
I'm crying out now, and you got nothin' to say  
Come down, down from this  
You're breaking down, down  
And you're running away from it all

Verse 3:

Pulled the veil right over me  
Played the game you played on me  
Lying through those teeth will make them rot

Chorus:

I let my guard down, and you got away  
I'm crying out now, and you got nothin' to say  
Come down, down from this  
You're breaking down, down  
Everything we've made  
I let my guard, and you got away  
I'm crying out now, and you got nothin' to say  
Come down, down from this  
You're breaking down, down  
And you're running away from it all (x2)

### **Said And Done**

**Music & lyrics by Nathan Da Silva**

Verse 1:

You showed me how love should really be  
Was blinded for so long and couldn't see  
Gave my wounded heart to you so suddenly  
But I can't seem to take it back – back to me

Chorus:

Are you feelin' what I'm feelin'?  
And where's this feeling from?  
Will you be there, with me right here?  
When all is said and done

Verse 2:

I know it's been a while and I can't remember when  
But every time I see you, I fall in love with you again  
I know we get these feelings you and I have shared  
And I wish I was not so scared  
Tryin' to find the ways to build the strength I need  
Accepting all the things that I just could not be  
Well, they say if you love someone then let em' go  
Well baby, I knew we had to let each other go

Chorus:

Are you feelin' what I'm feelin'?  
The feelin' of what's to come  
Will you be there, with me right here?  
When all is said and done

## **Burn!**

**Music by Nathan Da Silva**

**Lyrics by Nathan Da Silva & Jessica Lau**

### Verse 1:

Speedin' down the 60 tonight

Fire up and don't look back to watch it

Burn!

Urge to push the pedal tonight

Burying the needle just to watch it

Burn! Burn, burn!

### Chorus:

All green lights, stoppin' for nothin' now

60 to infinity!

No regrets, goin' the distance

### Verse 2:

Stop and go! Rev it up, accelerate

Fire up that engine just to make it

Burn! Yeah, yeah!

Road's the killer, so let me take another

Light 'em up with what you got, and that'll make 'em

Burn! Burn, burn!

### Chorus:

They're all green lights, stoppin' for nothin' now

60 to infinity

No regrets, goin' the distance

Don't tell me what I need now

I'll burn out in the sun

Don't take me for a ride now

I'll let you when I'm done

But will I ever be done?

### Bridge:

Will I ever be done?

Can I just let it burn?

Will I ever be done?

No! I'll just let it burn!

### Chorus:

All green lights, stoppin' for nothin' now

60 to infinity

No regrets, goin' the distance

Don't tell me what I need now

I'll burn out in the sun  
Don't take me for a ride now  
I'll let you when I'm done  
Don't wait, just burn it up now  
I'll come down when it's done  
But will it ever be done?  
Will it ever be done?

No!  
I will never be done!  
I will never be done!  
I will never be done!  
I will just let it burn!

### **Cauterize**

**Music & Lyrics by Nathan Da Silva**

#### Verse 1:

I'm left here wide awake  
Sleepless nights and hazy days  
Left wondering the wonders of this  
Damn infernal game  
Familiar but it's frayed  
Reassures that it's okay  
Not knowing that this shameless, silent  
Chase won't go away  
It makes you wanna scream  
It makes you wanna cry  
It makes you think it doesn't matter  
Even if you try  
These hands, they strangulate  
These words, they aggravate  
These walls, they suffocate

#### Chorus:

And when I leave it all behind  
This bleeding heart subsides  
Left with my wounds to die  
Cauterize this bleeding heart of mine

#### Verse 2:

I'm lying here in pain  
This weakened pulse sustains  
Left battered, broken  
Beaten to a pulp that just remains  
Familiar but it's fake  
Was this a big mistake?

This never ending runaround will  
Make me go insane  
It makes me wanna scream  
It makes me wanna cry  
It makes me think it doesn't matter  
Even if I try  
These hands, they strangulate  
These words, they aggravate  
These walls, they suffocate

Chorus:

And when I leave it all behind  
This bleeding heart subsides  
Left with my wounds to die  
Cauterize this bleeding heart of mine  
If I could see you one last time  
I'd stab your heart like mine  
Left with my wounds to die  
Cauterize this bleeding heart of mine

## **Perpetuate**

**Music & Lyrics by Nathan Da Silva**

Verse 1:

I've been trapped in this maze  
Can't remember the last time awake  
It's so hard to pretend  
And I wonder will this ever end  
All afraid of the ghost  
We lose sight of what matters the most  
I will wait patiently  
For the day that we all can be free

Verse 2:

It's a lonely affair  
Isolated with nothing to share  
Disconnected, we'll be  
All connected in disharmony  
I take comfort to know  
Our true colours through this really show  
I will wait patiently  
For the day that we all can be free

Chorus:

No shame – you blame  
To just perpetuate  
Unwind – unbind

Yourself and from the grind
